About the webpage

- The purpose of our website

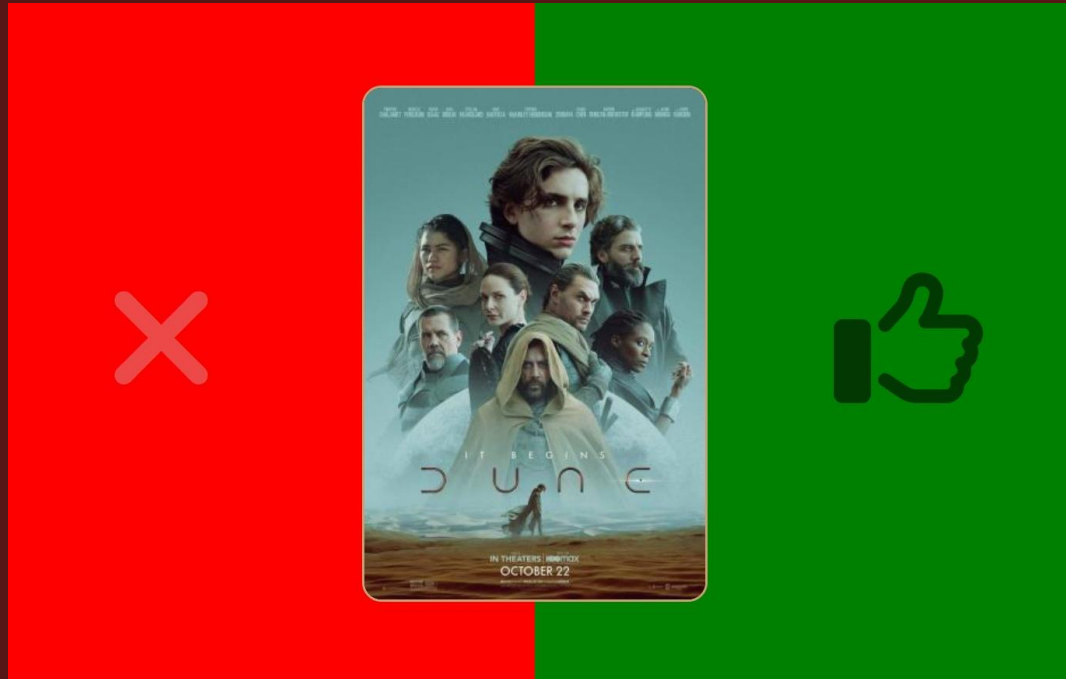

If you happen to be in a situation where you want to watch a movie with someone else, but you can't decide what to watch, IGENIS will help you by finding the most appropriate option for all of you.

01

About the webpage

- How it works?

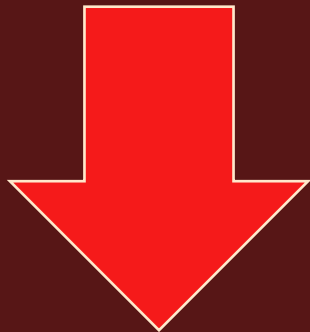

It has a wide collection of movies, from old sci-fi movies to new romantic comedies, where players can decide whether they **like it** or **not**.

About the webpage

- How it works?

If somebody is not familiar with a movie, there is a short description, genre and rating when you hover over the poster.

First Man

Year: 2018

Duration: 141 min

Genre: Biography, Dramam, History

Description:

A look at the life of the astronaut, Neil Armstrong, and the legendary space mission that led him to become the first man to walk on the Moon on July 20, 1969.

Rating: 3.65

01

About the webpage

- How it works?

In the end, the website displays
the movie you should watch.

02

About the code

- How is it built & how does it work?

The movie properties are read from .txt file and then are converted into a JavaScript data set.

```
title1;duration1;year1;genre1;plot1;poster1;rating1  
title2;duration2;year2;genre2;plot2;poster2;rating2  
...
```

```
const film = {  
  title: title.trim(),  
  duration: duration.trim(),  
  year: year.trim(),  
  genre: genre.trim(),  
  description: description.trim(),  
  image: image.trim(),  
  rating: rating.trim()  
};
```

If someone decides to press the green button, the program will store it in an array and at the end displays the movie with the most likes.
